

Week 2

Backend Workshop

Hack4Impact Junior Development Team

#

Where We Left Off

Hack4Impact Backend Slack Channel

POST Method

- Update GET method to todo.ejs
- Add post method

```
app.use(express.urlencoded({ extended: true }));  
  
app.post('/', (req, res) => {  
  console.log(req.body);  
});
```

Creating Cluster

- Create an account at [MongoDB Atlas](#)
- Add new user and ip address
- Get connection string

Connecting to database

- Update index.js to require dotenv
- Create file named '.env'
- Add connection string in .env
 - Make sure to add username and password
- Require mongoose to connect to database
